Lab Exercise 3

- Choose 10 (optional) queries from the following link, read the semantics of those queries and execute them at DbPedia endpoint http://dbpedia.org/sparql using Apache Jena (use Lectures.java uploaded on Moodle, Week 5).

- https://aifb-ls3-kos.aifb.kit.edu/projects/spartiqulator/examples.htm

- Submit the results of the queries (before the next lab) as a single Word/PDF document on Moodle. You can limit/reduce long results.
